Yukon 20-50x50 WA

Sku # 21014

This full-featured optic device is in a water-resistant body, allowing clear viewing in all weather conditions, and a multi-coated lens that ensures high light gathering capabilities and provides excellent contrast and resolution. Whether the Yukon 20-50x50 spotting scope is used for observing nature while hiking or camping, hunting large or small animals or used for surveillance and law enforcement, it is conveniently small and surprisingly durable. The 20-50x50 is the perfect scope to take anywhere including forested and closed in areas. While other scopes make you choose one magnification, the Yukon uses a combination of cutting-edge optics and mirror technology to give the viewer more observation variety in a smaller device. However, make no mistake; this scope does not sacrifice power to its compact size. There is only one other scope that utilizes the 20-50x50's technology, but it doesn't compare to Yukon's affordability and value.

Overview

Body Description

Yukon 20-50x50's body is rubber armored. Due to this fact the scope can be use in adverse weather conditions (for example, in the rain, fog, snow, etc.). Objective lens cap is incorporated in the Yukon's body, preventing loss, as well as securely shield the lens from accidental faults, blows, dirt and other undesired effects.

Optics / Performance

The considerable surface area of the 50mm objective lens provides immense light gathering capability, producing high resolution in a variety of lighting situations. Yukon's special multi-layered magnesium fluoride coating contributes to the sharp imaging. A Newtonian reflector system allows this compact, lightweight scope to vary its magnifying power from 20x to 50x providing comfortable viewing and a wide field of view and clarity. Therefore, while other scopes make you choose one magnification, the Yukon uses a combination of cutting-edge optics and mirror technology to give the viewer more observation variety in a smaller device.

Features and Benefits

- Newtonian Reflector Optical System
- Variable Power
- Durable Rubber Armor Body
- Compact & Lightweight
- Detachable Sighting Device
- Padded Corduroy Case
- Neck Strap
- Multicoated Optics
- High Resolution
- Water Resistant

- Tripod Mountable

Specs

Model	21014
Lens Diameter, mm	50
Magnification, x	20-50
Eye Relief, mm	14
Exit Pupil, mm	2.5
Diopter Adjustment, D	+/-5
Field of View, m at the Distance of 1000 m	44
Minimum Focusing Distance, m	10
Length, mm	240
Width, mm	110
Height, mm	76
Weight, kg	0.7
Tripod Mount, inch	1/4; 3/8

Package Contents

- Yukon 20-50x50 WA / Yukon 20-50x50 WA Red
- Objective and Eyepiece Covers
- Detachable Sighting Device
- Padded Corduroy Case
- Neck Strap
- Cleaning Cloth
- User's Manual
- Warranty Card
