Futurus 12x50WA Woodworth Sku # 22033C

The Futurus 12x50WA Woodworth binoculars are the most universal multitask device of the Woodworth series. This model is a trade-off decision between magnification and light gathering capacity. The Futurus 12x50WA Woodworth binoculars are equally good for a wide range of day applications as well as amateur astronomic observation. The housing of the binoculars is made of lightweight shock-proof polymers. The specific coloring of the Woodworth™ binoculars is an indispensable disguise means for a hunter in field conditions. Rubber armored cover combined with dust-protective gaskets ensure trouble-free operation in unfavorable conditions (rain, snow, etc.). The binoculars are extremely ergonomic and fit a hand perfectly. All Futurus binoculars come equipped with a wide handy strap and carrying case for safe storage and transportation.

Overview

Optics

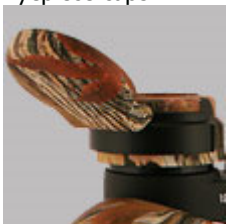

Optical parts of the binoculars are made of high quality optical glass with the True Color™ multicoating, which ensures high light gathering capacity, fine color rendering, bright and crisp image along the entire field of view.

The Eclipse™ caps

The Eclipse™ objective lens caps are fixed on the binoculars' housing to secure them from being lost. The objective lens caps can be thrown back on the binoculars' body, fitting closely on it without disturbing observation.

Eyepiece caps

Eyepiece caps protect eyes against side flash thus increasing image quality, the caps can be removed, if necessary.

Tripod mount

With a 1/4" adapter the binoculars can be attached on a tripod.

Features and Benefits

- Camouflage Coloring
- Optimal Magnification
- Rubber Armored
- Ergonomic
- Tripod Adaptable
