NVB Tracker Pro 2x24

Sku # 25022

Observe the night in a new fashion as you try out Yukon Advanced Optics' new night vision binoculars. The Tracker line of night vision binoculars is compact, lightweight and provides a wide field of view. The water resistant body increases the binoculars' versatility, while the central focus knob and fixed eye span distance provide comfort and reliability. The soft, one-piece eyecup prevents external light distortion and light leakage from the device, allowing the user to remain hidden in the night. The flip-top lens caps are an additional feature that allows the lens caps to be moved out of the way with a twist of the wrist. Tracker binoculars utilize built-in PULSE™ system illuminators for enhanced image clarity in total darkness. Dual IR unit of NVB Tracker Pro 2x24 optimizes the observation process by night. The main IR illuminator enables concentrated vision at a distance of up to 150 m. The auxiliary wide-angle IR illuminator provides excellent panoramic picture at short range of up to 30 m.

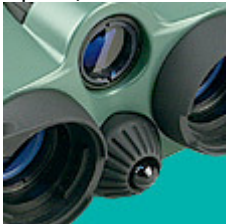

Overview

Body Description

The night vision tubes housed in the rugged, RUBBER ARMORED™ body, provide high-quality viewing in night time conditions.

Optics / Performance

Lenses of the binoculars are made of high-quality optical glass. Being fully multi-coated, they provide high resolution and light-gathering power that makes image quality really excellent.
