NVB Tracker RX 3.5x40

Sku # 25024

Observe the night in a new fashion as you try out Yukon Advanced Optics' new night vision binoculars. The Tracker line of night vision binoculars is compact, lightweight and provides a wide field of view. The water resistant RUBBER ARMORED™ body increases the binoculars' versatility, while the central focus knob and fixed eye span distance provide comfort and reliability. Viking binoculars utilize built-in PULSE™ system IR illuminators for added image clarity in total darkness. The soft, one-piece eyecup prevents external light distortion and light leakage from the device, allowing the user to remain hidden in the night. The ECLIPSE™ flip-top lens caps are an additional element that allows the lens caps to be moved out of the way with a twist of the wrist. NVB Tracker RX 3.5x40 comes with removable, individual, collimated 40 mm doubler lens that provides 3.5x magnification and increases range of detection without any loss of the image quality. By removing the doubler lens NVB Tracker RX 3.5x40 can be transformed to a 2x24 unit.

Overview

Body Description

The night vision tubes housed in the rugged, RUBBER ARMORED™ body, provide high-quality viewing in night time conditions.

Optics / Performance

Lenses of the binoculars are made of high-quality optical glass. Being fully multi-coated, they provide high resolution and light-gathering power that makes image quality really excellent.
